

CERTIFICATE OF PARTICIPATION

This Certificate is awarded to

Abraham Festus

for successful completion of

Python

We hereby confirm that **Abraham Festus** has successfully completed the following course at ReDI School of Digital Integration:

Python

Python is a 52-hour course aimed at teaching its participants basic skills in programming. It consists of 26 sessions each two hours long. The sessions were on a Tuesday and Thursday weekly from March until June 2021

After this course, the participants have learned about:

- Comfortable writing Python code
- Familiar with all the basics
- Comfortable using all the standard data types (including dictionaries, tuples, lists)
- Familiar with the concept of Object Oriented Programming
- Able to use python packages, as well as split code into smaller modules
- Know how to read and write external files
- Able to easily debug code and find errors
- Able to test python code
- Ready to join advanced courses (Backend or Data Science)
- Able to think more like a programmer

Four career workshops were part of the course:

- Start Your Tech Career
- Application Writing
- LinkedIn & Networking
- Mastering the Job Interview

ReDI School of Digital Integration is a non-profit organization that promotes economic and social integration of newcomers and asylum seekers in Germany and Europe. The courses offered at ReDI School are not part of government policies or public programs. Participation in the courses is voluntary and free for the participants. ReDI School is financed through donations and works through the voluntary commitment of the teachers.
